

Django

Python 2.x 2.7 , Python 3.x 3.6

Django is a high-level Python Web framework that encourages rapid development and clean, pragmatic design. Built by experienced developers, it takes care of much of the hassle of Web development, so you can focus on writing your app without needing to reinvent the wheel. It's free and open source.

Examples

Hello World with Django

Make a simple Hello World with your django.

Let's make the Url pattern for our app.

URL Conf:

```
from django.conf.urls.defaults import *

urlpatterns = patterns('',
    (r'^hello_world/$', 'dot.path.to.view.hello_world'),
)
```

Now let's set the view page. It will show the **Hello World** in the webpage.

View:

```
from django.http import HttpResponse

def hello_world(request):
    return HttpResponse("Hello World")
```
